

We are designers.  
We are explorers.  
We are inventors.  
We are even technologists.

We like to think.  
We like to play.  
We like to create.  
We are continually evolving.

creative engine

While our tools  
continue to change with technology,  
our ability to harness  
the power of communication  
through innovative ideas  
and intelligent thinking  
remains the core of our existence.

*Lotus*  
 The Lotus Flower  
 Used medicinally as a physical, emotional,  
 mental, and spiritual healing facilitator.

*healing facilitator*

Because it has buds, blossoms,  
 and seed pods simultaneously  
 on the same plant,  
 it symbolizes the  
 past, present, and future.

*compassion*  
 A symbol of love, compassion, and mental purity.  
*Lotus purity*

  
 DR. MONTANARELLA

*Bio Development International, Inc. (BDI), is a specialty project development firm focusing on the development, financing, construction and operation of energy projects and systems which support sustainable economic growth and are compatible with both the natural environment and the local community.*

*Our guiding philosophy directs our efforts toward the conservation and optimization of the earth's natural resources. Our target projects are typically founded upon the establishment of energy producing facilities either stand-alone, or as the centerpiece of an integrated environmental industrial complex. Our energy facilities will produce electricity using state-of-the-art, highly-efficient fossil fuel technologies and by utilizing the earth's renewable resources - wind, water, and biomass. The electrical generation and energy production can support the efficient development of an ecological industrial complex and the implementation of integrated solid waste management systems designed to recover, recycle, and reuse post industrial, commercial, and consumer wastes.*

The hydro power project currently in development is located in Jiangxi Province in the People's Republic of China. The project consists of a dam, water tunnel, and generating station with a capacity of 18 MW. The construction began in October 1996 - by May of 1999, the Project will be completed and will commence the production of electricity to be sold to the local electricity bureau.

The next hydro facility in the planning stage, is the development of 28 MW we have under contract as per a decree of law issued by the Ministry of Industry in Italy.

**Bio Development International, Inc.**

**PetroFiber Corporation**  
Hemlock, New Hampshire - 1980

PetroFiber operates a wood fuel procurement and recycling organization which, in addition to whole tree chips, takes in suitable wood material and processes it into suitable boiler fuel for biomass applications.
